**INSERT** New Finding of Fact:

"The APS 2009 rate settlement required 32 MW of solar PV to be installed on a needs basis. Third Party Owned Generation (TPOG) incentives are awarded strictly according to the prioritization matrix in a competitive bid process. The Commission finds that it is in the best interests of Arizonans, ratepayers, APS and the solar industry to keep the current system and avoid further market disruption. Thus, we adopt APS's original proposal for the 2011-2013 Schools and Government program, including a requirement that incentive levels be set at a 25% reduction from their 2011 levels. This 25% reduction in one year shows that the program is providing value for ratepayers."
